

Idaho Geology Field Camp Application

Prerequisites: The most important prerequisite is that the student be in **STRONG** physical condition and be ready to “jump in with both feet” to an intensive 16 hour-a-day, 6 days-a-week group learning experience. Completed assignments are due several nights a week, with a culminating final map project at the end of each field area. If the student is a junior or senior Geosciences Major, specific course prerequisites are flexible, though **Structural Geology** and **Sedimentary Geology** are at the top of the list. All applications must be received by **February 15th**.

Instructions: Items needed to complete your field camp application: (1) this form, (2) your personal statement and (3) a letter of recommendation from a faculty member addressing your “ability to participate in a physically and academically demanding 5-week group experience in the Idaho mountains”. Mail, fax, or attach this document with personal statement in an email (geology@isu.edu). Early applications are encouraged and receive preferred admission. If you want to attend this camp it is best to apply early and make a strong statement as to why this is your first choice.

COURSEWORK

(Indicate grades received)

Introductory Geology		Sedimentology/Stratigraphy		Mineralogy	
Historical Geology		Structural Geology		Petrology	
Paleontology		Geographic Information Systems - GIS			
Geochemistry		Geomorphology		Cumulative GPA	
Other geology courses (Please list)					

Please attach a statement that summarizes:

- your prior field experience in geology,
- any independent research projects you have completed,
- what your goals are for the next year and the next five years,
- why you are applying to the Idaho State University Geology Field Camp

Send completed form to:

Idaho State University - Geology Field Camp
